Feeder: An all purpose academic App

Alpha (Group 20)

IIT Bombay

November 5, 2016

Overview

[Introduction](#)

[Web App](#)

[Android App](#)

Introduction

Feeder is the app every college should adopt for the students. In short the app serves 2 basic things:

- For Students: It provides a personalized dynamic academic timetable. With so many deadlines for different courses an app to serve as a reminder for all academic puroposes is a very good option.

- For Professors: To provide good quality education it is important to have regular feedbacks. Also in todays world with almost every student uses a smartpohone and thus its easy to give feedback per module covered, per exam, per test. Feeder provides a platform to make this happen.

Overall it is a perfect tool to help both professors and students.

Web App

- The web application is administered by professor.
- It provides platform to professors to add feedback forms and deadlines which students can view on the mobiles.
- Professor can check feedback in really helpful format with help of graphs.

Android App

- The Android App is meant for the students.
- It provides platform to student to view feedback forms and assignment deadlines.
- It has a very friendly UI with use of different colors for different courses.
